ANNUAL UTILIZATION REVIEW
CHILDREN/ADOLESCENTS HOSPITALIZED IN A
COMMUNITY PSYCHIATRIC UNIT DURING FISCAL YEAR 2007-2008**

The annual utilization review of children and adolescents hospitalized in a community psychiatric unit was initiated by the Administrator's Office on January 1, 1992. The current review is the fifteenth in this series. The historical series of tables at the end of the report seeks to display the utilization patterns on a year-to-year basis.

While the whole question of hospitalization of children and adolescents is a concern of the Lackawanna-Susquehanna Counties Mental Health/Mental Retardation Program, three (3) issues are of particular concern. These three (3) issues are the hospitalization of children under ten (10) years of age, the presence of substance abuse, and rates of readmission. The last issue had been incorporated into the Program's Quality Management Plan of 2004 as a goal area. The objective of this goal was to decrease the percentage of children and adolescents who were readmitted to a community inpatient hospital within 30 days of discharge. The objective was to decrease the percentage from 9% of all admissions to 7% of all admissions. Since that time, the rate of re-admissions within 30 days has decreased. The current study reflects a decrease to 6.7%. The addition of tables 18 and 19 were included to begin looking at potential trends related to lengths of stay by hospital and readmission intervals by hospital and county.

Over the sixteen (16) year period, 1992 through fiscal year 2007-2008, there have been 3,682 admissions, of which 346 (9.4%) have been of children under ten (10)

years of age. During fiscal year 2007-2008, the number of children hospitalized under the age of ten (10), decreased by eighteen (18) children. The percent of children under the age of ten (10) who were hospitalized as a percentage of all children hospitalized also decreased from 15.2% to 7.2%.

Incidents of substance abuse were not routinely reported until fiscal year 1994-1995, at which point the historical series was initiated.

COMMUNITY PSYCHIATRIC INPATIENT HOSPITALIZATION OF CHILDREN/ADOLESCENTS

During fiscal year 2007-2008, there were a total of 209 admissions of children and adolescents to community psychiatric inpatient hospitals, with an unduplicated count of 173 children/adolescents hospitalized.

Scranton Counseling Center, BSU I, accounted for 136 admissions, and Tri-County Human Services Center, Inc., BSU II, for 73. One hundred thirty-six (136) children/adolescents were from lower Lackawanna County; 39 from upper Lackawanna County and 34 from Susquehanna County. One hundred eighty-six (186) of the admissions were voluntary, while 23 were involuntary.

Of those hospitalized, 184 children/adolescents were Caucasian; 8 were Black; 10 were Hispanic; and seven (7) were identified as other. There were 15 children under the age of ten (10). Violent and aggressive behavior was documented as the reason for hospitalization in 102 cases and 20 children/adolescents had known diagnosis for reported substance abuse or active treatment for substance abuse.

The majority of children/adolescents were referred for hospitalization by their Base Service Units (71) or the Hospital (71) and First Hospital accounted for 104 of the admissions. One hundred eighty-eight (188) of those hospitalized had medication prescribed during their stay.

Several items deserve to be highlighted:

1. There was a decrease in the total number of admissions from 217 in fiscal year 2006-2007 to 209 in 2007-2008. This represents a 3.7% decrease.

A 12% decrease in admissions occurred in Lackawanna County.

However, Susquehanna County experienced an increase of 88%.

2. The unduplicated number of children/adolescents hospitalized in Lackawanna and Susquehanna Counties decreased from 211 to 183 in 2006-2007 or 13.2%. In 2007-2008 this number was 173, a decrease of 5.5% over the previous year.
3. The number of children/adolescents under 10 years of age decreased from 32 in the previous year to 15 in the current year, or 7.2% of admissions.
4. The percentage of children/adolescents who were hospitalized because of violent/aggressive behavior increased from 42.8% of admissions to 48.8% of admissions.
5. Total days hospitalized in Lackawanna & Susquehanna Counties decreased from 2,361 in Fiscal Year 2006-2007 to 2,125 in the current year.
6. Reported substance abuse grew from 4.0% in Fiscal Year 1999-2000 to 9.6% in Fiscal Year 2007-2008.
7. Thirty-six (36) of the children/adolescents, or 17.2% had more than one admission during Fiscal Year 2007-2008. Of the 36 readmissions, 38.9% occurred within 30 days of discharge from the hospital. This represents an increase from the previous year, in which 35.3% of the readmissions occurred within 30 days of discharge from the hospital. Out of the three hospitals that are most widely used by the Lackawanna-Susquehanna

Joinder, the hospital identified as having the shortest average length of stay was (9 days). The hospital did not demonstrate a higher percentage of hospitalizations resulting in readmissions, as might be expected.
